

TESTIMONIALS

I found studyspanishonline.org on Google and tried it. I ended up studying twice a week for three months and my Spanish-speaking friends tell me that I sound much better and that I appear to be understanding them much better too. I was very pleased with the teacher that I had and with the materials. I would highly recommend it!

My classes were made easy and fun and the “maestra” was very patient. The cost was much cheaper than university classes and I learned much more in a much shorter time. I found that I was much more motivated using this method of learning and that I got much more out of it.

This is the best way to learn the Spanish language in a short amount of time. I was determined to learn this time and I now consider myself relatively fluent after only three months of studying on-line. The materials, the teacher and the methods were all conducive to learning without stress and pressure.

Eric L.

I studied on-line for two months and then made arrangements to go to Nicaragua to study at the school and meet the teacher that I had only seen on a computer screen. I was really impressed by the whole operation. The school was very professional and they did some great community work. The teacher was actually working out of her house and taking care of her kids. They scheduled me for two weeks AT THE SCHOOL, and she came in to give me my lessons. This is a first-class operation.
